

Cell Strainers

Description

Cell Strainers, Nylon mesh, Blister packed, Sterile

Purpose

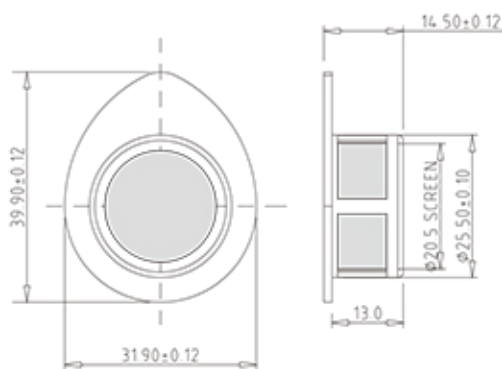

Cell strainers are sterile, rapid, easy-to-use devices for isolating primary cells to consistently obtain a uniform single-cell suspension from tissues

Materials

Frame: PP (Polypropylene)

Mesh: Nylon

Dimensions (Unit: mm)

Features

- Available in 3 mesh pore sizes: 40µm, 70µm and 100µm
- 3 different colors: blue, white and yellow, for easy identification
- Made of a strong nylon mesh with evenly spaced mesh pores
- Improved uniformity of single cell suspensions
- The extended lip on the strainer enables aseptic handling with forceps
- Design to fit perfectly into a JET 50mL centrifuge tube
- Non-cytotoxic
- DNase/RNase free and Non-pyrogenic
- Sterilized by irradiation SAL10⁶ (ISO11137)
- Shelf Life: 3 years after month of production
- Manufactured in a class 100,000 room environment
- Manufactured under ISO13485 and ISO9001 quality management system
